Subject: MLPAComments: Oppose MLPA in current form

OPPOSE the entire MLPA Process in current form.

RLFF has no place in foisting their agenda on all by funding the process. What they are doing is blatant & illegal hijacking of the public policy process.

If this issue is so important to the *people* of California then the *people* of California should fund it through the General Fund—NOT a Special Interest Group/Environmental Organization with an agenda—or any other Special Interest Group. The Federal Government should also provide funding as the California Coast belongs to every citizen of this nation.

On the opposite end of the spectrum how would everyone like it if the Commercial Fisherman's Association offered to do what RLFF is doing? Think about it people!!!
